PROFILE SUMMARY

Experienced software engineer with 6 years of proven track record of delivering effective web and mobile frontend, and backend development solutions. Proficient in React.js, React-Native, Next.js, Angular, JavaScript (ES6+), TypeScript, and other user interface libraries or frameworks and backend technologies such as Nodejs, Express.js, Nest.js, MongoDB, PostgreSQL, GraphQL, and RESTful APIs, with a strong focus on producing user-friendly and visually appealing web and mobile applications with great user experience. Possess excellent teamwork, effective collaboration with other stakeholders, excellent written and verbal communication skills, task prioritization skills, and a commitment to staying up to date with the latest software development technologies and industry trends.

PROFESSIONAL EXPERIENCE

Software Engineer - Remote — Lagos, Nigeria

Epic Payment Technology Limited. — **March 2026 – Present**

- Built and maintained scalable full-stack web applications using JavaScript, TypeScript, React, and Node.js, improving feature delivery speed by 35% across 4 production products.
- Developed responsive frontend interfaces with React and TypeScript, reducing page load time by 40% and increasing mobile user engagement by 28%.
- Designed and integrated 25+ RESTful APIs and third-party services, improving system interoperability and reducing manual operations by 60%.
- Optimized backend services and database queries across MySQL and MongoDB systems, cutting API response times from 1.8s to under 700ms.
- Implemented CI/CD workflows, Git-based code reviews, and automated testing pipelines, reducing deployment errors by 45% and improving release frequency from weekly to daily.

Software Engineer (AI Evaluation) - Remote — Palo Alto, California, USA

Turing Enterprises Inc. — **Nov 2024 – Dec 2025**

- Designed, developed, and maintained efficient, high-quality code to train and optimize AI models.
- Collaborated with researchers and annotators to execute **Reinforcement Learning with Human Feedback (RLHF)** and refine reward models.
- Led efforts in **Supervised Fine-Tuning (SFT)**, including creating and maintaining high-quality, task-specific datasets.
- Conducted **evaluations (Evals)** to benchmark model performance and analyze results for continuous improvement.
- Created and refined optimal responses to improve AI performance, emphasizing clarity, relevance, and technical accuracy.

Software Engineer - Remote — Lagos, Nigeria

Movam Technology Limited. — **Nov 2023 – Dec 2024**

- Developed scalable, responsive and optimized web applications utilizing the latest versions of Angular, React and Next.js, resulting in an average page load time decrease of 40%.
- Collaborated with the UI/UX design team to create seamless user experiences across multiple platforms and screen sizes by translating design mockups, resulting in a measurable increase in user engagement of 20%.
- Led the integration of new testing frameworks, reducing the number of bugs by 30% and improving overall product quality.
- Conducted regular code reviews and provided constructive feedback to ensure adherence to best practices and modern web technologies, resulting in an average code quality score of 90%.

Software Engineer - Hybrid — Lagos, Nigeria

Optisoft Technology Company (Nig.) Ltd. — **Feb 2022 – Jun 2023**

- Built and maintained large-scale responsive and scalable web applications using the latest versions of React, Angular and Next.js with minimal latency, user-friendly interface and cross-browser compatibility.
- Developed and executed a comprehensive training plan for new hires, which resulted in a 50% reduction in onboarding time and increased productivity by 25%.
- Cross-functional collaboration with other teams such as the design and back-end team to develop and deliver new product features, resulting in a 25% increase in customer satisfaction metrics.
- Designed, Developed and Delivered code that support new product features and enhancements in an agile environment.

Web Developer - On-site — Lagos, Nigeria

Stutern Limited. **Nov 2020 – Jan 2022**

- Built user interfaces for web applications using React or Angular, and Redux for state management with react or NgRx for state management with Angular using SOLID principles.
- Collaborated with other cross-functional teams to design and implement innovative RESTful API solution using Node.js, Express, MongoDB or Postgres which increased data access speed by 30%.
- Adopted test driven development (TDD) while writing web application code to deliver higher quality software.

SKILLS

Frontend Skills: HTML5, CSS3, JavaScript, Typescript, React, React-Native, Expo, Next.js, Angular, Angular-CLI, Signals, RxJS, NgRX, Angular-Material, Micro-frontend, Context API, React-hook-form, Yup, Zod, Grunt, Gulp, Redux, Redux-thunk, Redux-saga, Redux-Toolkit, RTK-Query, React-Query, Webpack, Babel, NPM, Yarn, Vite, Bootstrap, SCSS, TailwindCSS, Shadcn, Material-UI, jQuery, DOM Traversal, AJAX, Axios, Zustand, Tanstack, Apollo-Client, Jest, React Testing Library, Jasmine, Karma, Figma, Leaflet, Mapbox, SSR, SSG, ISR, CSR, PPR, Caching techniques, WCAG, PWAs, Web performance, Responsive design principles, mobile-first development.

Backend Skills: Node.js, Express.js, Nest.js, SQL, NoSQL, PostgreSQL, MongoDB, Sequelize, Prisma, TypeORM, RESTful API, GraphQL, JWT, Firebase, Supabase, Sanity, Sentry, Winston, WebSockets, Socket.io, Redis, Microservices, RabbitMQ, Cypress, Jest, LangChain, Authentication, Authorization and security.

Other Skills: Cursor, GitHub Copilot, Claude, Augment Code, Version Control Systems (Git), GitHub, Gitlab, Bitbucket, CI/CD, AWS (CloudFront, S3, Lambda, EC2, RDS, Amplify), GitHub Actions, Docker, Kubernetes, Jenkins, Framer Motion, OOP, SEO Optimization, Agile Methodology, Fintech, EdTech, Real Estate (PropTech), SaaS, E-commerce, MedTech, Vercel, IOT, Operating Systems (Windows, MacOS, Linux), Ubuntu, Open source contributions, Excellent debugging skills, Unit testing, Integration testing, Automated Testing, Leadership, Attention to detail, Strong analytical and Excellent problem-solving skills.

PROJECT EXPERIENCE

1. Movam Shipment Tracking Platform – (https://movam.ng/auth/users)

- Built this logistics SaaS web application used to track shipments vehicles and contains other amazing features such as a backtracking feature, a geofencing feature, an over speeding report feature, a night driving report feature, and a tampering report feature, to mention a few.

2. Joble AI Call and Meeting Schedule Agent – (https://joble.app)

- Built a SaaS AI Call Agent that books appointment, reminds and informs participants of meetings, and transfers users to the company's customer representative if the user requests to speak to one. The Agent also shares reports of virtual meetings or calls using details found in the agent's call transcript which can be enabled or disabled by the user. The AI phone agent is in compliance with GDPR data protection policy.

3. Rosabon Treasury Customer Portal – (https://github.com/proxycrome/rosabon-web-treasury)

- Built a Fintech Application with a Customer platform for either corporate and personal users where users can invest or save and receive interest upfront, quarterly, biannually, or at maturity, fund their in-app wallets, download statements, withdraw or rollover after maturity, calculate compounding interest over time, verify and store their bank details during profile verification, perform their KYC and other amazing features.

EDUCATION

- **Bachelor of Engineering (B.Eng.) • Computer Engineering (2nd Class Upper)** • Nnamdi Azikiwe University, Nigeria.
- **Software Engineering Certificate.** • Stutern Graduate Accelerator • Lagos State, Nigeria.
